

The Heber Light and Power Plant erected in 1909.

Work proceeded and by March, 1909, the committee announced they were ready to install the power producing equipment. A Mr. Lund of Salt Lake City was hired on March 29, 1909 to install the equipment at a salary of \$125 per month during the time of installation. Laborers who were employed to work on the building were paid 25 cents an hour or 50 cents an hour if they furnished a team.

On May 10, 1909, E. Parley Cliff was appointed city electrician and wiring inspector to supervise the installation of wiring in homes throughout the community.

By fall of 1909 the residents of Heber, Midway and Charleston were enjoying electrical power, a factor which may have influenced many to re-elect Mayor Clyde in the November, 1909 election. On November 15, 1909, the council passed a resolution that any resident desiring a street light in front of his home could install the light and receive free electric power from the city.

On February 10, 1910, the executive committee of the plant reported that the total cost of constructing and equipping the plant was \$66,789.66. Heber was granted three-fourths ownership, with Midway and Charleston owning one-eighth shares each.

The plant served the communities and their entire needs adequately until 1946 when the Heber City Council and town boards of Midway and Charleston met to discuss an additional hydroelectric plant on Snake Creek. Joseph Hylton was serving as mayor at the time. The project was approved and work was completed early in September, 1949, at a cost of \$161,387.00. Lorenzo A. Wootton and Hugo Price directed the
